H.M.C.S Cormorant

H.M.C.S “Cormorant”, a small Naval Craft arrived here last night or early today. Today she appears to be engaged with H.M.C.S Porte St. Jean, which arrived here on the 16th, in coating, and preparing to raise a cannon which has lain on the bottom of the harbour of Louisbourg for the past 200 years. The raising of a gun is supposed to be part of the Louisbourg Bicentenary Celebrations which is to take place on the 26th 27th and 28th of the present month. At present considerable preparations have been made in order that the celebration may be a success.

Old Cannon Fired

An old cannon mounted at the northeast corner of the museum at the Louisbourg National and Historic Park was fired this evening, in all likelihood for the first time since Louisbourg became a British possession 200 years ago on next Saturday.

This, a French Naval gun was raised from the bottom of Louisbourg Harbour in the spring or early summer of 1895. With another gun which was raised at the same time, but considerably smaller it was mounted on an old carriage at the Louisbourg Railway station where it remained for a number of years. In 1936 these two guns were presented to the Louisbourg Museum by the Dominion Steel and Coal Company Limited.
